

# Google Sheet Data: FAQ!D2

## Cell Content:

Category: EcoBite App

Question: What is EcoBite?

Answer: EcoBite is an AI-powered application that helps restaurants, consumers, and organizations reduce food waste through automation and intelligent recommendations.

Category: EcoBite App

Question: How does EcoBite help users manage food waste?

Answer: EcoBite uses machine learning to track food inventory, predict spoilage, and suggest the best ways to use or donate surplus food before it expires.

Category: EcoBite App

Question: Who can use EcoBite?

Answer: EcoBite can be used by households, restaurants, caterers, and local governments that want to manage food efficiently and sustainably.

Category: EcoBite App

Question: Is EcoBite available for both Android and iOS?

Answer: Yes, EcoBite is available on both Android and iOS platforms, making it accessible to all types of users.

Category: EcoBite App

Question: Does EcoBite require an internet connection?

Answer: EcoBite requires an internet connection for real-time data synchronization, AI recommendations, and donation coordination.

Category: AI and Automation

Question: How does EcoBite's AI predict food spoilage?

Answer: EcoBite's AI uses data such as purchase date, temperature logs, and product type to estimate shelf life and alert users when items are nearing expiration.

Category: AI and Automation

Question: Can the AI automatically create meal plans?

Answer: Yes. Based on available ingredients and expiration dates, EcoBite's AI can suggest recipes and meal plans to minimize waste.

Category: AI and Automation

Question: Does EcoBite's AI learn from user habits?

Answer: EcoBite continuously learns from user behaviors, adjusting reminders and suggestions for more accurate food management.

Category: AI and Automation

Question: Can the AI track donations automatically?

Answer: Yes. Once donation preferences are set, EcoBite can automatically schedule and notify donation partners for food pickup or drop-off.

Category: AI and Automation

Question: Is the AI capable of analyzing restaurant sales data?

Answer: EcoBite integrates with POS systems to analyze sales patterns and forecast future demand, helping reduce over-purchasing.

Category: Food Donations

Question: How can restaurants donate excess food through EcoBite?

Answer: Restaurants can list surplus food on the EcoBite platform, where verified charities and NGOs can claim and schedule pickups.

Category: Food Donations

Question: Can individuals donate leftover food?

Answer: Yes, households can post safe, unused food items, which local food banks can collect through EcoBite's

donation network.

**Category: Food Donations**

**Question:** How does EcoBite ensure food safety during donations?

**Answer:** EcoBite partners only with certified organizations that follow food safety standards, and tracks donation handling through digital logs.

**Category: Food Donations**

**Question:** Can donations be automated?

**Answer:** Once donation thresholds are set, EcoBite's automation can trigger donation listings when certain quantities of surplus food are detected.

**Category: Food Donations**

**Question:** Is there a limit to how much can be donated?

**Answer:** There are no limits; however, EcoBite ensures donations comply with local safety regulations and partner capacity.

**Category: App Usage**

**Question:** How can I register in EcoBite?

**Answer:** Simply download the app, create an account, and set up your profile with your food inventory preferences.

**Category: App Usage**

**Question:** How do I track my food inventory?

**Answer:** EcoBite allows users to scan barcodes or manually input items to track stock levels and expiry dates automatically.

**Category: App Usage**

**Question:** Can I sync EcoBite with my restaurant's inventory system?

**Answer:** Yes, EcoBite supports integration with common inventory and POS systems for automatic data syncing.

**Category: App Usage**

**Question:** Does EcoBite send notifications for expiring food?

**Answer:** Yes, users receive smart alerts before products expire so they can use, donate, or repurpose them in time.

**Category: App Usage**

**Question:** Can multiple users manage one account?

**Answer:** Yes, businesses can add team members to share access to inventory, donations, and reports.

**Category: Businesses**

**Question:** How can EcoBite help restaurants save money?

**Answer:** By predicting demand and preventing overstocking, EcoBite reduces costs on wasted ingredients and inventory losses.

**Category: Businesses**

**Question:** Can EcoBite help in menu planning?

**Answer:** EcoBite's analytics recommend menu adjustments based on inventory data, seasonal trends, and customer preferences.

**Category: Businesses**

**Question:** Does EcoBite provide sustainability reports?

**Answer:** Yes, EcoBite generates monthly reports showing food saved, carbon emissions reduced, and donation impact.

**Category: Businesses**

**Question:** Can I use EcoBite for my catering business?

**Answer:** Absolutely. EcoBite works for catering services to track batch ingredients, events, and leftover redistribution.

**Category: Businesses**

**Question:** Is EcoBite compatible with accounting software?

Answer: Yes, EcoBite can export data for accounting and sustainability audits.

Category: Consumers

Question: Can EcoBite suggest recipes?

Answer: Yes. EcoBite's recipe engine suggests dishes based on available ingredients to help reduce waste.

Category: Consumers

Question: How does EcoBite promote sustainable eating?

Answer: By showing the environmental impact of saved food, EcoBite educates users on mindful consumption.

Category: Consumers

Question: Can I use EcoBite without listing donations?

Answer: Yes, users can focus solely on tracking food use and waste reduction if they prefer.

Category: Consumers

Question: Does EcoBite track food expenses?

Answer: EcoBite provides monthly insights on food spending and waste to help households plan better.

Category: Consumers

Question: Can EcoBite send reminders to buy groceries?

Answer: Yes, EcoBite can remind users when stock levels are low or when frequently used items run out.

Category: Local Government Unit (LGU) Partnership

Question: How do LGUs support EcoBite?

Answer: LGUs collaborate with EcoBite to coordinate food redistribution programs and community donation drives.

Category: Local Government Unit (LGU) Partnership

Question: What do LGUs gain from using EcoBite?

Answer: EcoBite provides analytics on food waste trends, helping LGUs develop better sustainability policies.

Category: Local Government Unit (LGU) Partnership

Question: Can EcoBite help in community feeding programs?

Answer: Yes. LGUs can use EcoBite to match surplus food donors with feeding centers efficiently.

Category: Local Government Unit (LGU) Partnership

Question: Is EcoBite suitable for rural areas?

Answer: EcoBite can operate in low-bandwidth environments, making it effective even in rural regions.

Category: Local Government Unit (LGU) Partnership

Question: How can LGUs monitor donation activity?

Answer: EcoBite's dashboard allows LGUs to view donation metrics and track participating businesses in real time.

Category: Technology & Security

Question: Is EcoBite secure?

Answer: Yes, all data is encrypted and stored securely following GDPR and Philippine Data Privacy laws.

Category: Technology & Security

Question: Does EcoBite collect personal information?

Answer: EcoBite collects only the data necessary for food tracking and user experience improvements, following strict privacy standards.

Category: Technology & Security

Question: Can I export my EcoBite data?

Answer: Users can export their data anytime for reporting or analysis purposes.

Category: Technology & Security

Question: Does EcoBite work offline?

Answer: Basic inventory access is available offline; AI recommendations and donations require internet connectivity.

Category: Technology & Security

Question: How does EcoBite ensure data accuracy?

Answer: AI algorithms cross-check entries with historical patterns to maintain accurate inventory tracking.
